

Custom Rubber Grommet

We are a professional Custom Rubber grommet manufacturer with more than 30 years of experience, producing more than 15,000 rubber products for customers. Our experienced team can help you deal with various problems from design to production. For any custom special shape grommet can quickly complete the design drawings and manufacturing, give you the most professional advice

Product Introduction of the Custom Rubber grommet.

Custom Rubber grommet material usually uses rubber or silica gel as raw material, such as SBR and NBR, and NR can also be used to achieve the best performance and suitable physical properties for product use. so as to produce high-quality Custom Rubber grommet products. Formula is also very important, mature technology is an important condition for product quality ! Xiamen Liangju Rubber Technology Co., Ltd. specializes in the production of Custom Rubber grommet products, the use of high-quality rubber.

The product is stuck on the metal plate and the wire is passed through the middle. The purpose is to protect the wire from being cut by the metal plate. Most of the requirements require environmentally friendly ROHS, REACH in special electronic equipment also requires to meet the flame retardant level UL94-V0 select sheath When selecting the sheath, please focus on GD GW these two dimensions, because this is with the metal plate hole size and metal plate thickness matching.

2. Product Parameter (Specification)

Product Name:	Custom Rubber grommet
Material:	NBR, HNBR, EPDM, SILICONE, VITON, FLS, FFPM, PTFE
Size:	Any size, Customized/standard and nonstandard
Color:	Any size, Customized/standard and nonstandard
Packing:	plastic bag&carton box or according to your requirements
Sample time:	20-25days
Application:	Varies

3. our service.

1. Inquiry about our products can be replied within 12 hours.
2. Professional & experienced staff help you solve problems of silicone and rubber products.
3. Accept customized shape, material, hardness, temperature, size, color, logo and packing.
4. Mode of production: Compression or injection or extrusion.
5. We have a comprehensive range of in-house manufacturing facilities, allowing us to provide fast and effective manufacturing.

4. Quality Control and Certifications

We serve our customers with high quality Customized Shape Rubber Gaskets by strictly follow ISO 9001:2015 and IATF 16949.

6. FAQ

1. Do you supply material?

Yes, we have our own mixing rubber factory and can supply you with Synthetic Rubbers to fit your applications.

2. If OEM is acceptable?

Yes, Samples are Free of charge

3. What Is EPDM Rubber ?

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

E-mail: Dylan@tec-rubber.com

EPDM is a synthetic rubber polymer and is made from ethylene and propylene monomers. This rubber was developed in the early 1960's and used to produce variety of products like radiator and steam hoses, freezer gaskets, tires, roofing membranes and aircraft seals to name only a few.

4. Why is rubber used to produce industrial products?

Rubber has certain unique properties which makes it suitable to produce rubber products which are widely used in various industrial applications. Rubber is water repellent. It is resistant to alkalies and weak acids. Rubber has elasticity, toughness, impermeability, adhesiveness, and electrical resistance. These properties make rubber useful as an adhesive, a coating composition, a fiber, a molding compound, as well as an electrical insulator.

5. Which type of rubber is best for my application?

There are a range of natural and synthetic rubbers with different properties, making some more suitable than others for particular applications—the key of course is choosing the most appropriate one! For specific requirements, please ask our rubber products specialists for guidance.
