

Round Rubber Grommets

Round Rubber Grommets are a kind of accessories of the wiring equipment. Rubber grommets are more weather-resistant. There are used for wires through in the middle of holes. The purpose is to protect the wires from being cut easily by sharp plate cuttings, and at the same time, it is dustproof and waterproof. It is widely used in various fields such as electronics, electrical appliances, machinery, sports equipment, furniture, and lighting.

1. Product Introduction of the Round Rubber Grommets

Rubber grommets are a kind of accessories of the wiring equipment. There are used for wires through in the middle of holes. The purpose is to protect the wires from being cut easily by sharp plate cuttings, and at the same time, it is dustproof and waterproof.

Advantage:

They have high heat resistance.

They are also less affected by the negative effects of UV light and ozone.

This type of grommet is also more durable and tear-resistant.

It does not dry up, crack and come lose easily.

Rubber grommets are more resistant to phosphoric, hydrochloric, sulfuric and Saltpeter acid.

It can also handle bigger temperature spans than other types of grommets.

Rubber grommets are quicker and easier to install since they can be placed on one side only. It is not necessary to reach the opposite side of the installation to attach a lock nut.

It is the ideal grommet to use when space is restricted since it does not protrude and eat up a lot of space.

It is ergonomically better since you don't have to manually screw them into place.

Rubber grommets are more economical and practical solutions.

When it is installed, the opening remains sealed until the membrane is pushed out.

2. Product Parameter (Specification)

Product Name:	Round Rubber Grommets
Material:	NBR, HNBR, EPDM, SILICONE, VITON, FLS, FFPM, PTFE
Size:	Any size, Customized/standard and nonstandard
Color:	Black
Packing:	plastic bag&carton box or according to your requirements
Sample time:	20-25days
Application:	Automotive
Warranty:	2years

3. our service.

1. Inquiry about our products can be replied within 12 hours.

2. Professional & experienced staff help you solve problems of silicone and rubber products.

3. Accept customized shape, material, hardness, temperature, size, color, logo and packing.

4. Mode of production: Compression or injection or extrusion.
5. We have a comprehensive range of in-house manufacturing facilities, allowing us to provide fast and effective manufacturing.

4. Quality Control and Certifications

We serve our customers with high quality Customized Shape Rubber Gaskets by strictly follow ISO 9001:2015 and IATF 16949.

Dimensional Inspection

Incoming QC

In-process QC

5. Packing, Payment and Shipping

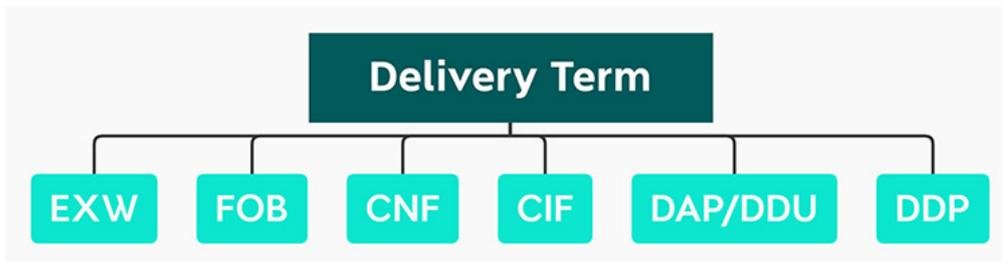

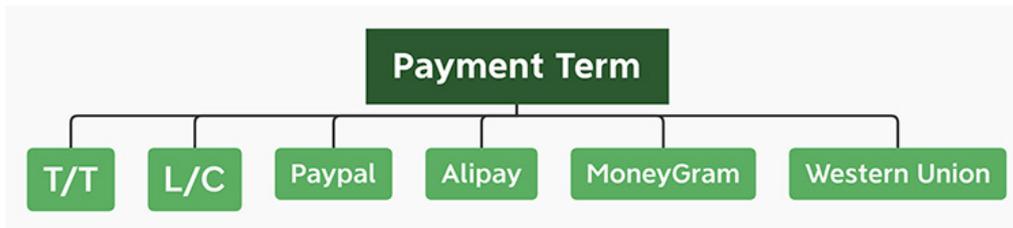

Our packing for all the Customized Shape Rubber Gaskets, strong enough to ensure its safety throughout the whole delivery no matter domestic or oversea shipping. Customized Packing/LOGO/Labeling are Available.

ISO 9001 : 2015

IATF 16949 : 2016

6. FAQ

1. Do you supply material?

Yes, we have our own mixing rubber factory and can supply you with Synthetic Rubbers to fit your applications.

2. If OEM is acceptable?

Yes, Samples are Free of charge

3. What Is EPDM Rubber ?

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

E-mail: Dylan@tec-rubber.com

EPDM is a synthetic rubber polymer and is made from ethylene and propylene monomers. This rubber was developed in the early 1960's and used to produce variety of products like radiator and steam hoses, freezer gaskets, tires, roofing membranes and aircraft seals to name only a few.

4. Why is rubber used to produce industrial products?

Rubber has certain unique properties which makes it suitable to produce rubber products which are widely used in various industrial applications. Rubber is water repellent. It is resistant to alkalies and weak acids. Rubber has elasticity, toughness, impermeability, adhesiveness, and electrical resistance. These properties make rubber useful as an adhesive, a coating composition, a fiber, a molding compound, as well as an electrical insulator.

5. Which type of rubber is best for my application?

There are a range of natural and synthetic rubbers with different properties, making some more suitable than others for particular applications—the key of course is choosing the most appropriate one! For specific requirements, please ask our rubber products specialists for guidance.
